Detailed installation steps (software-wise)

The steps should be listed in a way that it prepares the system environment to be able to test the codes of the book.

We suggest that reader works in Anaconda environment. The Anaconda can be downloaded from `https://www.anaconda.com/download/`, follow the instructions to install based on your OS.

1. Create a new environment using `conda create –n myenv python=3.5`. We suggest TensorFlow on Python 3.5 is more stable.
2. Activate the created environment using `source activate myenv` or `conda activate myenv`
3. In the Install needed packages using `pip install` or `conda install`.
